

Factsheet

Revas Client Portal

The window to your business

The Revas Client Portal provides a centralised management reporting window through which you can view and amend the information held on all back office functions of your business managed by Revas – accounting, management reporting, payroll, time recording and billing.

The Revas Client Portal can also be used by clients as a publishing portal through which staff around the world can have secure access to information relevant to them. Revas can set up an admin facility to enable your staff to upload and access any document onto the portal from anywhere in world, via the Internet.

This site service is hosted on Revas' secure, high redundancy server facility.

Each client portal is unique to each client and is built according to your specific needs to provide you with access to a wide range of information and the relevant reporting functionality for your business.

Key client benefits

- Accessibility 24/7 to the key information you need
- A detailed view of your key business information
- Accurate, detailed, real time information to facilitate good decision making
- Control at your fingertips.

How does the Revas Client Portal work?

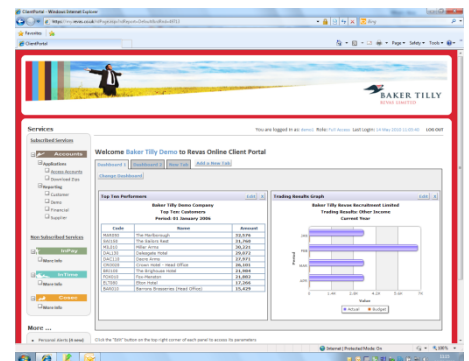

The Client Portal enables our clients to view documents and reports via the Internet from anywhere in the world. The system is available 24/7 and can be accessed via any major browser including Internet Explorer, Firefox and Chrome.

When you log in, you are presented with a 'dashboard' of key information relevant to your business. Information is presented via a series of tabs with data presented graphically and/or in text. Each dashboard is tailored to your specific requirements and data can be exported as either a PDF or an Excel file.

The full suite of financial and management reports available via the portal includes monthly and quarterly Profit and Loss, Balance Sheet and Customer/Supplier Reports.

All reports operate in real time so when data is entered in any of the Revas applications – accounting, payroll, time reporting, billing – the information reported is automatically updated. Clients can also drill down to the underlying transactions on which the report is based as well as detailed departmental and other operational information.

Below is an example of a dashboard.

What is Revas?

Revas is the outsourcing arm of Baker Tilly, a leading UK and international provider of accountancy and business advisory services. It provides a full range of outsourced accounting, payroll, billing, time recording and corporate secretariat services for organisations which need a cost-effective, tailored alternative to managing their pivotal back office functions in-house.

Revas' multidisciplinary team of specialists apply technology intelligently to give clients a truly bespoke service that frees them up to focus on what they do best - running their businesses.

If you would like further information on how the Revas Client Portal can provide a window onto your business, please visit www.revas.co.uk or contact us at revas@bakertilly.co.uk.
